

Agile Advantage™ Upgrade to Agile PLM™

✦ Quick and Seamless Upgrade from Agile Advantage to Agile PLM

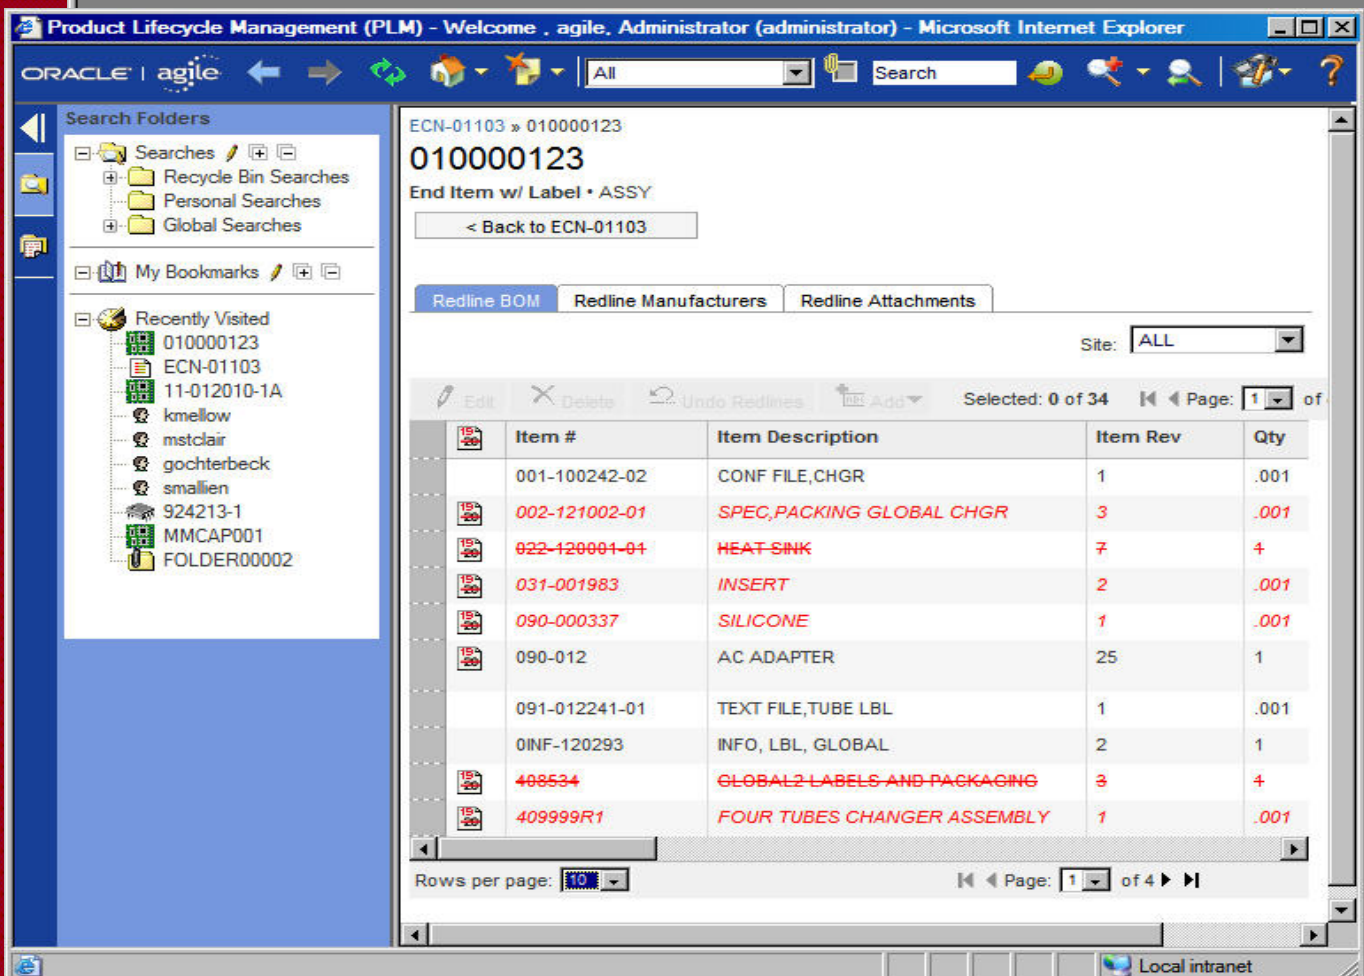

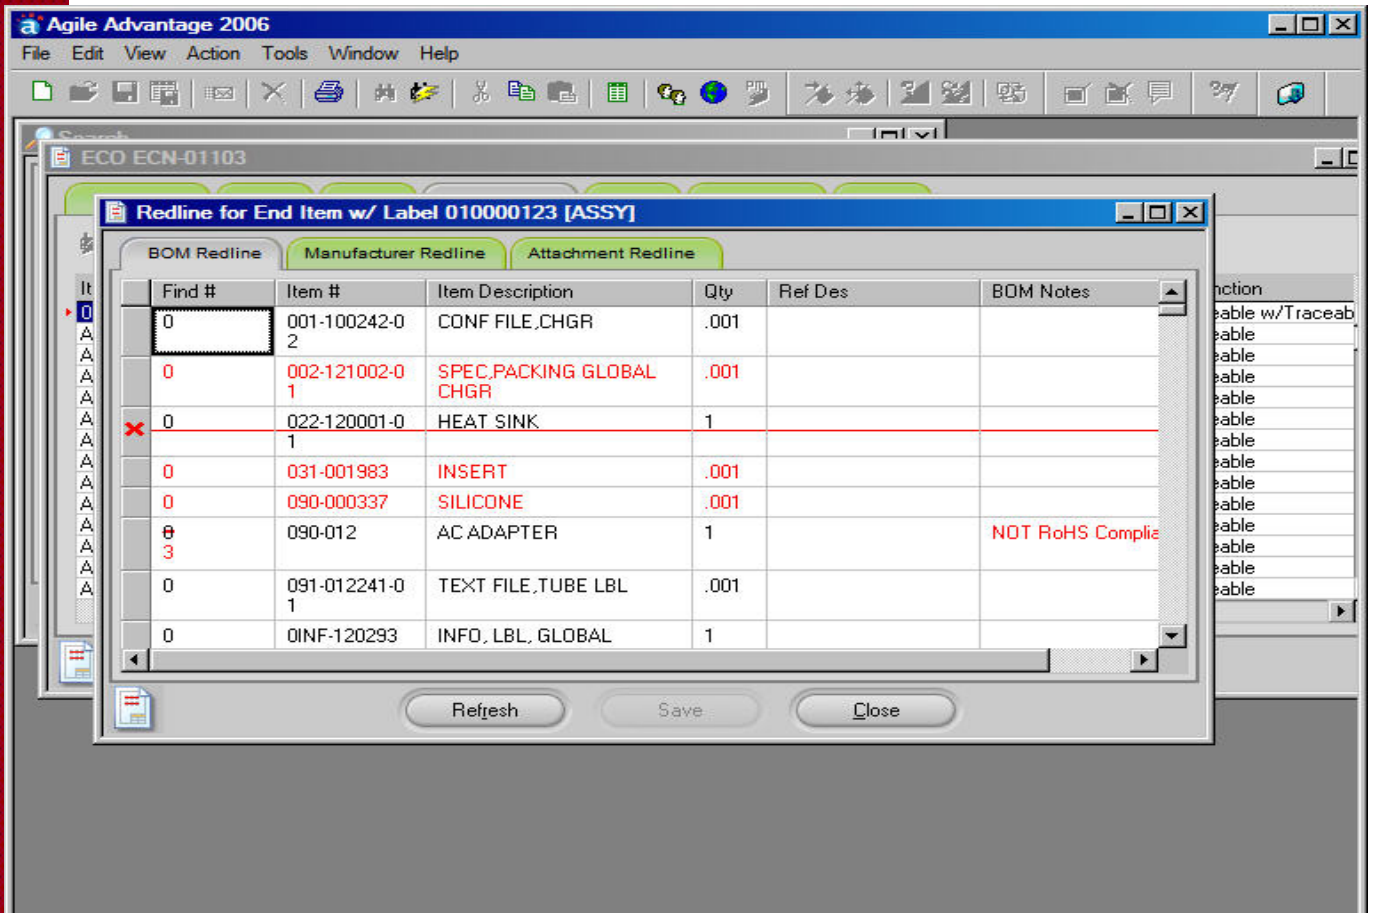

Oracle recently announced that it is offering a licensing path to all Agile Advantage customers to move to the enterprise version of its Product Lifecycle Management solution, Agile PLM 9. Synchronus has spent the past few months developing a repeatable methodology with a robust upgrade toolset that consists of multiple software modules to help customers achieve this goal promptly and accurately with the least disruption to your business. Without requiring any customer resources, the Synchronus team of professionals with more than 150 years of combined experience with both Agile Advantage and Agile PLM, will perform the upgrade and migration process while protecting the integrity of your data and intellectual property. Data and files are upgraded in both the Oracle database and the file vaults, simultaneously as part of this migration process.

Customers require an efficient, painless, and timely migration process so that their efforts can stay focused on implementing the new functionalities featured in the Agile PLM 9. Our upgrade process is fast, seamless, and ensures an error-free migration to the new PLM solution. Synchronus has developed the migration tools and extensively tested them through a robust quality assurance process by experienced software engineers and professionals, who are well experienced with both Agile Advantage and Agile PLM solutions.

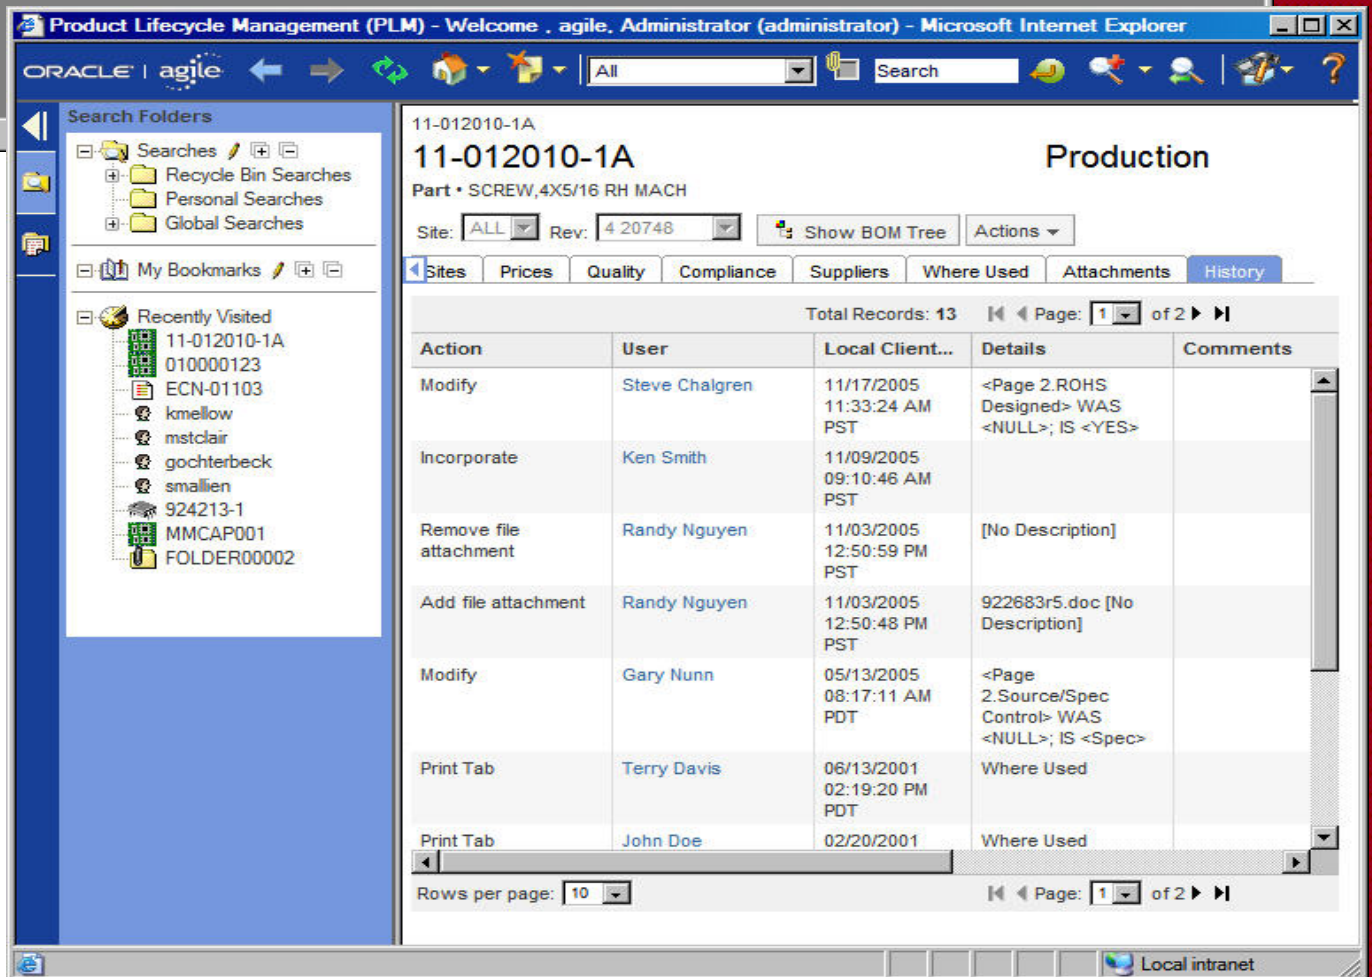

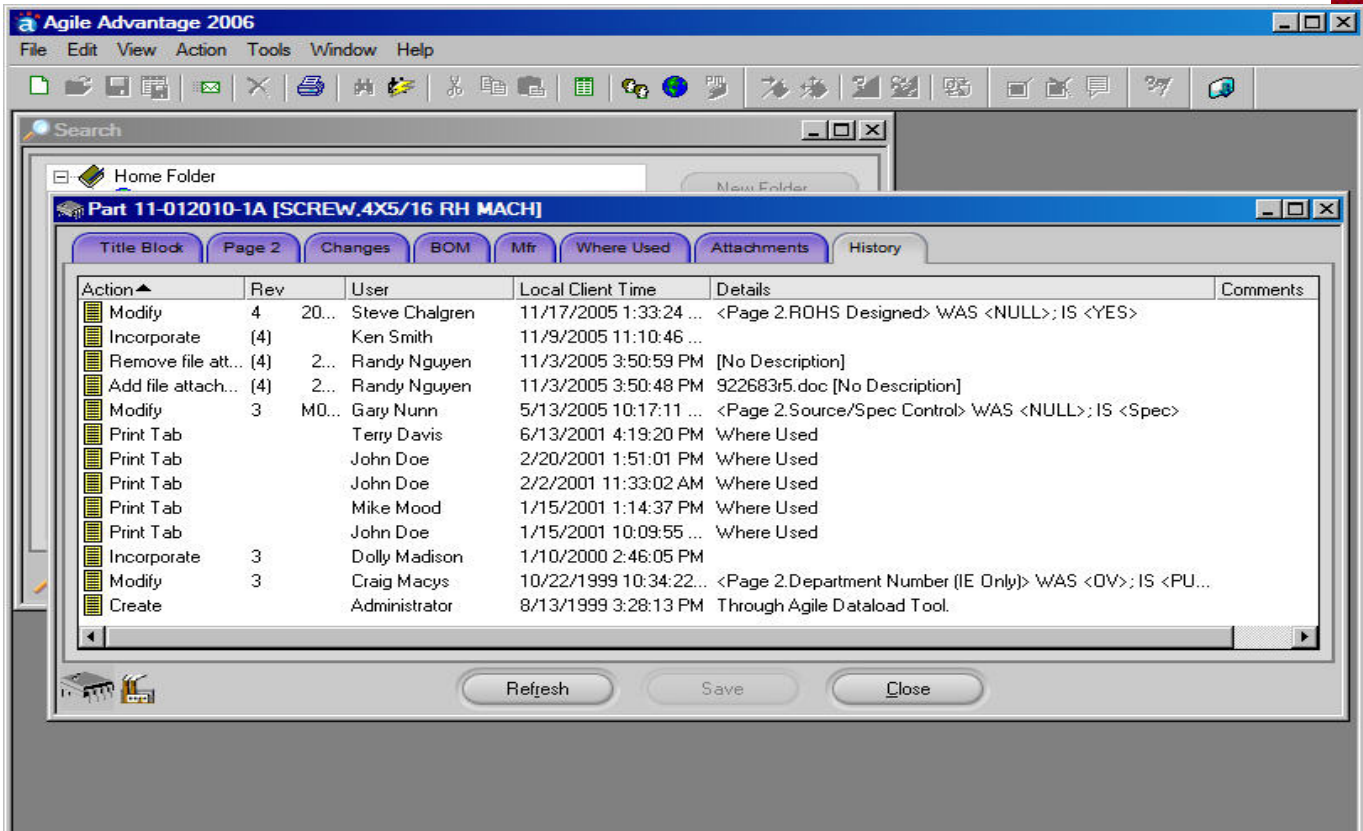

In the past several years, the Synchronus team has performed more than 100 Agile customer upgrades and implementations for small and medium enterprises as well as large global companies such as Dell, Qualcomm, Kyocera, Hitachi, and others. Such an experience ensures that we will painlessly and successfully transition you to Agile PLM so that you can immediately start reaping its benefits.
